Team Developer 2005 - Program Temporary Fixes (PTFs)

List of Defects Fixed

Program Temporary Fixes (PTFs) offer quick resolution to specific known problems in a given release. Therefore, PTFs do not go through the same extensive quality assurance and field testing as do Maintenance Releases or Major Product Releases.

This document contains a list of known bugs present in Team Developer 2005 and for which verified fixes have since been made in the base version. Since PTFs are cumulative, those fixes listed in a given PTF are available only in combination with all fixes listed for earlier PTFs.

PTF1 (Build 13724)

Defect ID	Description
80321	Some fonts are not getting set correctly on pushbuttons, group boxes, background text, check boxes and radio buttons.
80869	In Coding Assistant, typing an incomplete name, then Ctrl+spacebar, should bring up a list of names matching the partial name, but it does not.
80910	Team Developer crashes when the mouse is moved over a table on QuickTab form in which TTAddTool() and TTDeleteTool() are both called during SAM_Create.
81097	Right Justify and Center Justify formatting don't work.
81347	Team Developer crashes when a docked output window is closed.
81389	With OLE DB connections to Informix,invoking a stored procedure using function SqlPrepareSP will fail if the procedure name is supplied as a bind variable rather than a literal.
81612	Unable to open a Report Builder report if its name contains 4 or more double-byte characters in it.
81652	When the mouse is "hovered" over a defined variable, QuickInfo should appear, but does not.
81667	When you perform a Find operation while the Windows item is highlighted in the left pane of the IDE, the Find dialog box lacks a Selection radio button.
81739	Report Builder does not "remember" settings that direct different pages to different paper trays.
81740	When a SQLWindows application loads a second SQLWindows application using SalLoadApp(), on rare occasions it will get runtime error "cannot read file", followed by "cannot read application file".
82075	When connecting to SQL Server via OLEDB, and using a bind variable within the ROUND() aggregate function, user gets message "Error '-2147467259 Syntax error or access

	violation'".
82161	Class cQuickHTTP does not return correct Source and SourceSize properties for certain URLs.
82206	Specifying different trays on some printers doesn't work. Report Builder always prints from the top tray or tray 1.
82210	In Team Developer applications with large numbers of menu items, sometimes menu shortcuts do not work.
82211	In Team Developer applications with large numbers of menu items, sometimes invoking a menu item causes execution of the wrong code.
82255	Team Developer crashes when the child window of an MDI window is resized, then closed.
82287	When using the OLEDB consumer against a database other than SQLBase, changing DBP_AUTOCOMMIT at runtime from ON to OFF multiple times returns error "Cannot start more transactions on this session"
82300	SalReportPrint only prints one copy although nCopies parameter is greater than 1.
82302	Report Builder sometimes issues an error message stating that the report page size is larger than the paper size.
82310	Team Developer crashes when focus is set to child table column of parent form window after setting focus to child table column of child dialog window.
82562	Calling SalPrtSetup to change the paper type and the paper tray settings does not work; it prints using only the default paper tray.
82356	For form windows that are children of MDI windows, runtime focus should go to the first child window of the form, but does not.
82375	A form window specified as maximized at design time shows up in normal state under Linux.
82406	On Linux, it appears that Team Developer is using the rights of the user who installed it, not the user who is currently running it.
82422	Function SalColorSet() slightly changes the font size of pushbuttons. On Linux the appearance changes are more pronounced.
82570	Team Developer crashes after changing Page Range in the "Print" dialog when trying to print a report using Oracle database.
82635	Report Builder is not displaying TrueType fonts correctly.
82981	When porting a Report Builder CQT file from Team Developer 3.1 to Team Developer 2005, the rendering behavior is not identical for borders with dynamic line wrapping.
83054	Team Developer crashes when one repeatedly connects to various databases in the same session using OLEDB.
83100	Calling SAL function SalFileCopy from a C++ application crashes even after calling SalApiInit().
83241	Team Developer crashes if SalFile* functions are called on a file which does not exist.
83292	Team Developer deployer installs SQLBase components although it was requested not to install them.
83319	For applications that use qcktabs.apl, the user cannot add additional tabs to an existing instance of cQuickTabsForm.
83320	For applications that use qcktabs.apl, when the application is opened and a context menu is invoked, Team Developer crashes.
