

**GUPTA™**

A PLATINUM EQUITY COMPANY

**Overview  
&  
Technical Roadmap  
July 2003**

# Low Risk, Fast Development

GUPTA has 20 years experience providing proven, secure and reliable software that speeds application development and insulates applications from underlying platform changes allowing seamless movement into the future.

# Unmatched Reliability

GUPTA products power applications that affect millions of people everyday where reliability and security are absolutely critical such as when they fill a prescription, send a package, or use on-line banking services.

# Long Term Stability

GUPTA is owned by Platinum Equity, a technology leader with over \$4 billion in annual revenues. Platinum fosters a managed entrepreneurial environment in which each company is supported in managing and growing their business within their particular markets.

# SQLBase 8.5

## September 2003

- ▶ **Multiple Servers on a Single Machine**
  - ✓ This feature is unique to SQLBase. Allows ISVs & VARs to create their own installers to deploy SQLBase with their applications in a hidden, seamless, & isolated manner.
- ▶ **Multiple Outer-Joins & ANSI Syntax**
  - ✓ Corporate compatibility and portability of applications across the enterprise.
- ▶ **Huge Performance Improvements**
  - ✓ Overall performance improvements of 40% since 7.5.01
  - ✓ Reports will run much faster!
- ▶ **Improved Scalability**
  - ✓ Better performance in a multi-user environment
  - ✓ Easier and lower cost of deployment with single code line for 1 to 100 concurrent users

# Team Developer 3.1

## November 2003

### WAM and LINUX

- ✓ Communicates with non-Windows web servers
- ✓ Use the power of object-oriented development to create data-driven web sites quickly
- ✓ Improved Scalability - target SMB

### ▶ Enhanced Debugging

- ✓ Breakpoints Window
- ✓ Conditional Breakpoints
- ✓ Data Breakpoints
- ✓ Evaluation of Expressions

### ▶ COM+ Performance

- ✓ High performance N-tier development

### ▶ Report Builder Enhancements

### ▶ XML Support in Table Windows

# **Upcoming Product Releases**

# SQLBase (San Francisco)

- ▶ **Full UNICODE Support**
- ▶ **NEW Page Versioning**
  - ✓ Significant Performance Improvement
  - ✓ Separates readers from writers providing much higher performance in a multi-user environment
- ▶ **LINUX version of Server**
  - ✓ JAVA and PHP data drivers

# Team Developer (Yellowstone)

- ▶ **Full UNICODE Support**
  - ✓ Multi-language support
- ▶ **Improved Performance**
  - ✓ COM objects and OLE DB in particular
- ▶ **Simplified Deployment**
  - ✓ no need to localize TD applications anymore
- ▶ **Report Builder Enhancements**

# Team Developer (Grand Canyon)

- ▶ **Low risk, low cost path to .NET**
  - ✓ Preserve your investment in existing code
  - ✓ Keep the highly productive Team Developer programming environment
  - ✓ No need to convert to more complex and difficult to use languages
  - ✓ Create fully managed .NET applications
- ▶ **Intrinsic support for XML & Web Services**
- ▶ **Improved interoperability with all other CLR compliant languages**
- ▶ **Ride the .Net wave**

# Productivity, Cost Savings

- ▶ **GUPTA ensures your applications take advantage of leading technology without having to rewrite them**
- ▶ **Rapid development with business centric programming language**
- ▶ **SQLBase with UNICODE and page versioning will dramatically improve performance in a multi-user environment**

# GUPTA Core Strengths

Best-in-class RAD  
N-tier  
Development Tool

Best-in-class self-tuning,  
self-recovering  
easy-to-install-and-use  
embedded database  
product for  
under 100 users

.NET

Win32

SQL  
XML  
SOAP  
UDDI/WSDL  
JDBC  
OLEDB

J2EE

Standards-based, Platform-agnostic
